*Exceptional Experience*  
Pool Cleaning Made Easy

## M Series Built to Last

### Dolphin Supreme M5 Liberty (Cordless)

Unique battery-powered cordless robotic pool cleaner recommended for pools up to 15 m in length that are irregularly shaped and/or have in-pool obstacles, such as islands, pillars and bridges. Features integrated gyro and cleans pool floor, walls and waterline.

### Dolphin M 500

The M 500 allows you to sit back, relax and enjoy your pool with remote control programming. This advanced navigation, state of the art cleaner, with gyroscope, enables intervention-free cleaning of the pool floor, walls and waterline.

### Dolphin M 400

Brace yourself for a new experience with the ultimate pool cleaner. The M 400 cleans the walls, floor and waterline with optimal pool coverage, regardless of pool shape, slope or obstacles.

### Dolphin Supreme M 3

This robotic pool cleaner is reliable and requires little investment. With a Dolphin Supreme M 3 you can enjoy expert cleaning of your pool floor and cove, including those difficult to reach angles where the pool floor meets the walls.

Starting in 1983, we pioneered automated robotic pool cleaning technology. Today, Maytronics remains the market leader, continually setting new standards for technological innovation, design and reliability.

In everything we do, we strive to make the lives of pool owners more enjoyable. Our goal is quite simple, to enable an exceptional experience of a pure, clean, safe and relaxing pool.

## Enjoy the Dolphin advantages

The Dolphin M series of robotic pool cleaners was designed with the pool owner in mind. Get powerful performance coupled with exclusive Dolphin features that you won't find in any other cleaners! Real solutions for real pool challenges.

As the market's favourite for many years, Dolphin M robots have earned top marks for:

### Superior cleaning performance

- Cleaning all the way to the waterline, with triple-action brushing that scrubs and polishes the walls and floor \*
- Superior collection of dirt and debris leaves water crystal-clear
- Precise self-adjusting navigation and full-coverage cleaning

### Long-lasting reliability

- Built to last – for years of hassle-free cleaning
- Impediment-free operation in all pool conditions – with dual filters and two filtration level options

### Effortless Operation

- Fully automated – just set it and forget it
- Nonstop cleaning – with advanced obstacle escape mechanism

\* Depending on model

## About Maytronics

Nobody knows robotic pool cleaners like Maytronics – the company behind the top-selling Dolphin robots. For more than 30 years, we have been developing robotic cleaning solutions for all swimming pools.

## Superb pool cleaning made easy

Smartphone  
MyDolphin™ - App Control \*

MyDolphin™ app for convenient cleaning program setup and operation control, including manual navigation to direct your robot to clean specific parts of the pool.

Swivel - cable tangle prevention system

Dolphin's swivel cable eliminates tangled cables forever! As your Dolphin moves around the pool, the swivel ensures that the cable stays free and clear, allowing for complete pool coverage.

Ultra-fine Cartridge - with additional choice of net filters

Dual-level filtering ensures impediment-free operation in any pool conditions. Use the net filter at the start of the season to clear rough debris; for regular use, catch fine and rough debris with the ultra-fine filter cartridge.

Multi-Function Power Supply \*

Preset your Dolphin operation at a touch! Easily set cleaning programs, cycle time and a weekly schedule, delay operation, and check filter bag status, all via the touch-screen power unit.

CleverClean™ Coverage + Gyro - precise navigation system \*

Advanced scanning software and gyroscopic navigation system ensure floor, walls and waterline are fully covered using the most efficient route. The Dolphin automatically navigates around obstacles and quickly returns to its cleaning pattern.

Triple-Action Brushing \*

Triple-action brushing delivers extra-effective scrubbing and cleaning. The active brush spins at 2x the speed of the robot to scrub fine pool surface debris, leaving your pool water clean, clear, and healthy.

\* Depending on model

## Eco Friendly & Reduced Pool Running Costs

**Owning a Dolphin Robot can save you up to \$500 a year in pool running costs!**

*All this, while saving the environment as well!*

### Lower your Carbon Footprint

Dolphins save power by operating and filtering inside the pool. They are completely independent of the pools main filtration system. The great benefit of this is that water does not have to be pumped all the way to the filter pump, through bends, elbows it can be filtered in the pool – saving all the power to hydraulically move the water. This is supported by independent studies by Electrical Companies that have shown that **savings can be up to \$500 per annum** (even after the small running cost of a Robot is taken into account).  
Note – pool filtration is still needed – just not to the same level required when other cleaners are used.

### Save Water

Because Dolphins filter in the water, they remove the debris from the pool system. This in turn means that the main pool filter unit does not become clogged as quickly, which results in fewer backwashes. Estimates are that **backwashing is reduced by up to 30%** when using robots compared to all other cleaning methods.

### Save on Chemicals

Dolphins help to reduce chemical requirements of swimming pools. In Australia, the vast majority of pools have suction cleaners that are permanently in the pool and connected. In this circumstance, the skimmer is completely ineffective – the result is that all debris landing on the surface must slowly go through the water before eventually being collected and then held in the system until the next backwash. This organic matter requires chemicals to control – but with a Dolphin – the pool's skimmer starts working again! And around half of all organic matter is removed from the system – all this saves you and the environment from unnecessary chemicals!
